- 1.4 cubic feet of Storage
- Certified by UL to standard 60601-1 CAN/CSA C22-2 No. 601-1
- ENOCHS Encore 4250 replaces the Power 4000

The hospital grade dual electrical outlets are conveniently located at the foot end of the table. The outlets feature a dedicated circuit breaker that will trip if outlets are overloaded. A quick reset of the circuit breaker re-establishes power to the outlets, eliminating costly down time. The Power 4250 also features a SELV (safety extra low voltage) hand control, an accessory that can be ordered at time of purchase or added at a later date.

The footend of the table features a padded pullout leg extension, 4" deep stainless steel irrigation basin and the next generation instrument warming drawer system. The exclusive design of separate operation between the leg extension and basin allows for fast transition from one to other. The pull-out leg extension enables patients with limited hip rotation to be placed in a GYN position, while still giving the physician unrestricted access to the irrigation basin. The instrument warming drawer is designed to warm speculums and instruments to approximate body temperature.

Specifications for the ENOCHS ENCORE 4250 High-Low Examination Table

Warranty:	4-YEAR
Base Construction:	Fully welded all steel base
Power System:	Electro-Mechanical provides smooth and quiet movement
Power Adjustments:	Height: 24" - 40" Back: horizontal - 80 °
